Jordan Lockner

Jordan Lockner began his electrical career at Swam Electric in August, 2013 as a first-year apprentice. Prior to that Jordan attended YTI Career Institute in York, PA after high school. He received a diploma in Electrical Technology with a 3.66 GPA.

In September 2013 Jordan began his apprentice classes with the online classes through IEC. He completed all 4 years online in May 2017 as well as his on the job training hours. He then competed in our local IEC Central PA chapter for the 2017 Apprentice of the Year and finished first in that competition. He is now planning the trip to National IEC competition in October.

Jordan continues to learn and grow in his knowledge of the electrical business. He has also served on our safety committee for a one-year term. While on the committee he helped to develop an updated safety manual for the company and helped to improve the safety culture at Swam Electric. Jordan's work ethic, honesty and caring attitude for his fellow employees has made him a valuable employee at Swam Electric.
