

Katie Henson

Denier Electric Co., Inc.

In January 2006, Katie Henson decided to take a chance and leave her position at Target as 'Front of Store Manager' to become the receptionist at Denier Electric Co., Inc. From the start, it was very apparent that Katie would be a future leader at Denier.

As a fellow employee commented earlier in Katie's time at Denier:

"From a Contract Manager's perspective, I just thought I would pass this along, we are fortunate to have Katie working with us."

"It is great having someone like her on the Team!"

Katie's tenure as the receptionist was very short lived and in February 2007, she started her quick progression through the Payroll, Accounting, and Human Resource Departments. During this progression, Katie has been instrumental in Accounting, Employees Relations, Employee Benefits and the Company Performance Plan. Not only does she get the day to day tasks completed, she takes the time to train other employees, and maintains a positive attitude during stressful circumstances. She has become the point person when assistance or completion of a project is critical including Financial Audits, Corporate Taxes, Research and Development Tax Studies, Self-Funded Medical Plans, Retirement Plans and special projects for the President/CFO and Leadership of the company.

As an active member in CFMA, SHRM and Employee Resource Association she continues to gain knowledge and develop her leadership skills. Katie's also continues to sharpen her accounting knowledge completing accredited college accounting classes as needed.

As Denier prepares for the retirement of our current Controller, Katie is poised to take on the responsibility and leadership duties of the controller. More than just an employee, Katie constantly strives for the best not only for herself but for all employees at Denier Electric Co., Inc.
