

Carson Bishop InPwr Inc.

Carson Bishop is the epitome of an emerging leader, not only for InPwr Inc., but for IEC as a whole. He graduated from Rose-Hulman Institute of Technology in 2015, with a Bachelor of Science Electrical Engineering degree, and is currently pursuing his Professional Engineering license. Carson utilizes his incredible education to work through and lead new initiatives within InPwr Inc. Even though Carson is a solid electrical engineer, he is also in his third year as an IEC apprentice. This demonstrates his selfless approach and determination to push himself to learn everything he can about the electrical industry.

As one of the InPwr Inc.'s youngest leaders, Carson excels at coordinating with multiple departments, vendors, and manufacturers to ensure optimum project design. His immense knowledge in electrical calculation, lighting photometrics, and AutoCAD make him an essential part of our team. Carson has had to adapt to dealing direct with manufacturers in the electrical industry. Not only learning the terminology so they are speaking the same language but, in an effort, to showing how important our vendors are to us. Carson's customer service is something to be admired, as he proactively develops a solution to a problem, all the while understanding the cost impacts to the customer.

Carson makes his organization his top priority and is available nights and weekends to assist every department; he is dependable and known for his problem-solving skills. He also selflessly takes the time to methodically explain they "why's and how's" of what he is doing to less experienced team members. We are proud to have Carson on our team, as a leader and role model to our next generation!
